

NSG Laptop Comparison Criteria

Technology is an integral part of a connected and innovative learner, and it follows that the choice of device is an integral part of learning. We have taken great consideration into what criteria comprises an effective learning device.

- 1** Build Quality, Specs, Reliability, and Interface
A learning device is useless if it cannot be used by the student. The device should enable the student's full potential
- 2** Service
If the device breaks, its timely repair is of utmost importance.
- 3** Battery Life
The device should enable all day learning
- 4** Easy compatibility with existing school infrastructure
Having a HDMI port enables devices to connect to classroom infrastructure
- 5** Weight
Portability means the device is easier to keep with the student all day
- 6** Price
The initial cost of the device should be considered over the 3 years of the device's life
